

RE: My opposition to the Proposed Broadcast Ownership Changes

<br>

I wish to express my concern in the strongest possible terms about the proposed changes in Broadcast Ownership. My concerns are about two elements: the proposal itself, and the FCC's apparent concern about getting this proposal pushed through in a manner that appears to be hasty, impulsive, and without regard to the broad concerns of the public.

I strongly urge the FCC and all related persons and organizations to slow down in this matter. The proposal would bring about a sea change in the area of media ownership, and I feel that my concerns, those of my family and business, and the broader public at large would be discounted in the worst way.

I appreciate your attention to these matter

<br>

Sincerely,

George Glaser
